Note: For jointing other core configurations/sizes please contact Sicame Engineering Dept.

The **Sicame WB95/WB95XL** range of mains branch connectors accommodates an extensive range of LV mains cable styles and sizes.

The connector utilises the proven shear head, direct acting bolts (plated) thereby removing the need for pressure plates.

The plated bolts, combined with a standard plated yoke section, allow for the joining of copper conductor cores without the need for conventional brass gauze.

Note: For the jointing of CNE strands add the suffix 'N' to the end of the product code, pressure pads will then be included.
