Note: For jointing other core configurations/sizes please contact Sicame Engineering Department.

The **Sicame UMS95/2S** range of mains service connectors accommodates an extensive range of LV mains cable style and sizes.

The connector utilises the proven shear head, direct acting bolts (plated) thereby removing the need for pressure plates.

The plated bolts, combined with a standard plated yoke section, allow for the jointing of mains copper conductor cores without the need for conventional brass gauze.

Test Specification

Designed to meet the requirements of Engineering Recommendation C79 and IEC 1238-1.

Stranded service conductor less than 10mm² should be doubled and re-doubled, where necessary, to achieve a satisfactory cross section area.
